PART ONE: E-HEALTH OVERVIEW  1

1 E-Health: The Next Health Care Frontier  3
   Joseph Tan
   The Telebaby® Case  27
   Ronald Spanjers, Anne F. Rutkowski

2 E-Health Vision: Drivers of and Barriers to E-Health Care  37
   Joseph Tan
   Cyber-Angel: The E-Robin Hood Case  52
   Joseph Tan, Joshia Tan
PART TWO: E-HEALTH FOUNDATIONS  57

3 E-Health Perspectives: General Systems Concepts, Chaos and String Theories, and Social Science Thinking  59
   Joseph Tan
   Multicommunity E-Health Promotion Programming Case  82
   Joseph Tan

4 E-Health Records: The Lifeblood of E-Health Care  91
   Joseph Tan
   E-Primary Health Care and E-Health Records Cases  116
   Penny Grubb

5 E-Public Health Information Systems: E-Technologies for Public Health Preparedness and Surveillance  127
   Joseph Tan, Francisco G. Soto Mas, C. Ed Hsu
   E-Profiling of Community Health Performance Indicators Case  155
   Lee Kallenbach, Joseph Tan

6 E-Networking: The Backbone of E-Health Care  163
   Joseph Tan, Winnie Cheng
   Mobile Health Networks Case: Unconfined Mobile Bluetooth Technology for E-Medical Services  190
   Qiang Cheng, Huyu Qu, Yingge Wang, Joseph Tan

PART THREE: E-HEALTH DOMAINS AND APPLICATIONS  201

7 E-Health Domains: Surveying the E-Health Landscape: Cases and Applications  203
   Pam Forducey, Kawaljeet Kaur, Cynthia Scheideman-Miller, Joseph Tan
   E-Speech Therapy for Children in a Rural Oklahoma School Case  224
   Cynthia Scheideman-Miller, Pam Forducey, Sharon S. Smeltzer, Avery Clouds, Bob Hodge, David Prouty
PART FOUR: E-HEALTH STRATEGIES AND IMPACTS  363

12 E-Health Strategies: Reshaping the Traditional Health Care System  365
   H. Joseph Wen, Joseph Tan

   E-Health Technology Strategies and Impacts Case  396
   Jung P. Shim, William E. Sorrells

13 E-Health Care Technology Management: A Multifactorial Model for Harnessing E-Technologies  406
   George Eisler, Sam Sheps, Joseph Tan
Evidence-Based Medicine Case 439
Barry P. Markovitz

14 E-Security: Frameworks for Privacy and Security in E-Health Data Integration and Aggregation 450
Joseph Tan, Patrick Hung

Integrated Selective Encryption and Data Embedding for Medical Images Case 479
Qiang Cheng, Yingge Wang, Joseph Tan

15 E-Health Impacts on the Health Care and Health Services Industry: Surfing the Powerful Waves of E-Technologies 489
Joseph Tan, David C. Yen, Sharline Martin, Binshan Lin

E-Communities Case: Scalability Challenges in Information Management 515
Harris Wu, Joseph Tan, Weiguo Fan

PART FIVE: E-HEALTH PROSPECTS 521

16 E-Health Prospects: Mobile Health, Virtual Reality, and Consumer-Driven E-Health Systems 523
Joseph Tan

Virtual Reality Case 547
Joseph Tan, Pency Tsai

Name Index 554
Subject Index 562
Tables

Table 4.1 Barriers to Implementing Electronic Databases
Table 4.2 Health Information Privacy Principles
Table 5.1 Tan's Health Information Processing System and CDC-Provided Information Technology Specifications for Emergency and Bioterrorism Preparedness
Table 6.1 Nominal Bandwidth Requirements for Different Telemedicine Applications
Table 6.2 Nominal File Sizes of Common Medical Images
Table 7.1 E-Rehabilitation Applications at Integris Jim Thorpe Rehabilitation Center
Table 7.2 Clinical E-Rehabilitation Encounters at Integris Jim Thorpe Rehabilitation Center
Table 8.1 Major Socioeconomic and Health Indicators of Ethiopia and Sub-Saharan Africa
Table 8.2 Information and Communication Technology for Health in Ethiopia
Table 10.1 Decision Outcomes Included in Diagnosis Support System
Table 10.2 Question Items Included in Diagnosis Support System
Table 10.3 Evaluation Framework for an E-Diagnosis Support System
Table 10.4  Comparative Analysis of Performance: E-Diagnosis Support System Versus Human Experts
Table 10.5  Summary of Clinical Efficacy Evaluation Results for E-Diagnosis Support System
Table 11.1  Types of Attributes After Their Ascent in the Concept Hierarchy
Table 11.2  Attributes of Health Care Providers
Table 11.3  Results of Clustering Health Care Providers
Table 11.4  Comparison of the Clustering Results of Original and Optimal Concept Spaces
Table 11.5  Average and Standard Deviation of Credibility Scores
Table 12.1  E-Health Business Structures
Table 12.2  Opportunities for E-Stakeholders
Table 12.3  Challenges for E-Stakeholders
Table 12.4  E-Health Value Propositions
Table 13.1  Critical Attributes for Health Care Technology Management from Content Analysis
Table 13.2  Revised Model of Indicators
Table 13.3  Gap Score Differences Between Cluster 1 and Cluster 2
Table 13.4  Indicator Distribution
Table 14.1  Sample Data for Hospital
Table 14.2  Sample Data for Treatment
Table 14.3  Sample Data for Pharmacy
Table 14.4  Sample Data for Medicare
Table 14.5  An Integrated View of Hospital, Treatment, Pharmacy, and Medicare
Table 15.1  E-Technologies in Various Sectors of the Health Care Industry

Figures

Figure 1.1  Electronic Data Interchange Technology
Figure 1.2  Wisconsin Health Information Network (WHIN)
Figure 2.1  E-Health Care Systems and Subsystems
Figure 3.1  A Rich Picture of an E-Multicommunity Health Promotion Project
Figure 4.1  Conceptualization of Electronic Health Records
Figure 5.1  Model of E-Public Health Information System
Figure 5.2  The Convergence of Geographical Information Systems, Public Health Preparedness and Response, and Epidemiological Surveillance
Figure 5.3  An Integrated GIS-Based Public Health Preparedness System
Figure 6.1  E-Networking for E-Consumer Informatics
Figure 6.2  Comparison of Three E-Network Configurations
Figure 8.1  E-Medicine as an Information Clearinghouse
Figure 8.2  Conceptual Framework of Issues in Telemedicine Transfer in Ethiopia
Figure 8.3  Effects of National ICT Policies on E-Medicine Transfer Outcomes
Figure 8.4  Effects of ICT Infrastructure on E-Medicine Transfer Outcomes
Figure 8.5  Effects of E-Medicine Implementation Factors on E-Medicine Transfer Outcomes
Figure 8.6  Effects of Culture on E-Medicine Transfer Outcomes
Figure 10.1  SOAP: A Common Service Process for Managing Patients with Lower Back Pain
Figure 10.2  Architecture of a Web-Based Diagnosis Support System
Figure 10.3  A Diagnostic Interface That Uses Nonmedical Terms and Graphs to Represent Symptoms
Figure 11.1  Examples of Concept Hierarchies at a University
Figure 11.2  One Possible Scenario After the Ascent of a Nominal Attribute (Cluster B Moves Toward Cluster A)
Figure 11.3  Another Possible Scenario After the Ascent of a Nominal Attribute (Cluster A Shrinks)
Figure 11.4  Three Possible Scenarios After the Ascent of an Interval or Ordinal Attribute
Figure 11.5  Constructive Clustering Analysis Algorithm
Figure 11.6  Concept Hierarchies for Clustering Health Care Providers
Figure 12.1  Stakeholders in the E-Health Marketplace
Figure 13.1  Technology Management Framework
Figure 14.1  Architecture of E-Health Data Integration
Figure 14.2  Sample Schema for E-Health Data Integration
Figure 16.1  Traditional Process for Analysis of Users’ Information Requirements
Figure 16.2  Accountability Expectations Framework for E-Health Innovations

Exhibits

Exhibit 1.1  Video Image of a Baby as Transmitted Through the Telebaby Video Circuit
Exhibit 1.2  Telebaby Login Screen
Exhibit 1.3  Telebaby Camera Overview Menu
Exhibit 1.4  Parents at Home, with On-Line Telebaby Connection
Exhibit 1.5  Duration and Frequency of Telebaby Use
Exhibit 3.1  Precede-Proceed Model Applied to E-Health Intervention
Exhibit 5.1  Indexes for Community Health Profile
Exhibit 5.2  Community Health Profile
