Appendix B: References for Evidence-Based Chapters 285
Appendix C: Recovery Model Objectives and Interventions 305
Accountability is an important dimension of the practice of psychotherapy. Treatment programs, public agencies, clinics, and practitioners must justify and document their treatment plans to outside review entities in order to be reimbursed for services. The books in the Practice Planners® series are designed to help practitioners fulfill these documentation requirements efficiently and professionally.

The Practice Planners® series includes a wide array of treatment planning books including not only the original Complete Adult Psychotherapy Treatment Planner, Child Psychotherapy Treatment Planner, and Adolescent Psychotherapy Treatment Planner, all now in their fifth editions, but also Treatment Planners targeted to specialty areas of practice, including:

- Addictions
- Co-occurring disorders
- Behavioral medicine
- College students
- Couples therapy
- Crisis counseling
- Early childhood education
- Employee assistance
- Family therapy
- Gays and lesbians
- Group therapy
- Juvenile justice and residential care
- Mental retardation and developmental disability
- Neuropsychology
- Older adults
- Parenting skills
- Pastoral counseling
- Personality disorders
- Probation and parole
- Psychopharmacology
- Rehabilitation psychology
- School counseling and school social work
- Severe and persistent mental illness
- Sexual abuse victims and offenders
• Social work and human services
• Special education
• Speech-language pathology
• Suicide and homicide risk assessment
• Veterans and active military duty
• Women’s issues

In addition, there are three branches of companion books that can be used in conjunction with the Treatment Planners, or on their own:

• **Progress Notes Planners** provide a menu of progress statements that elaborate on the client’s symptom presentation and the provider’s therapeutic intervention. Each Progress Notes Planner statement is directly integrated with the behavioral definitions and therapeutic interventions from its companion Treatment Planner.

• **Homework Planners** include homework assignments designed around each presenting problem (such as anxiety, depression, substance use, anger control problems, eating disorders, or panic disorder) that is the focus of a chapter in its corresponding Treatment Planner.

• **Client Education Handout Planners** provide brochures and handouts to help educate and inform clients on presenting problems and mental health issues, as well as life skills techniques. The handouts are included on CD-ROMs for easy printing from your computer and are ideal for use in waiting rooms, at presentations, as newsletters, or as information for clients struggling with mental illness issues. The topics covered by these handouts correspond to the presenting problems in the Treatment Planners.

The series also includes adjunctive books, such as *The Psychotherapy Documentation Primer* and *The Clinical Documentation Sourcebook*, containing forms and resources to aid the clinician in mental health practice management.

The goal of our series is to provide practitioners with the resources they need in order to provide high-quality care in the era of accountability. To put it simply: We seek to help you spend more time on patients, and less time on paperwork.

**ARTHUR E. JONGSMA, JR.**

*Grand Rapids, Michigan*
ACKNOWLEDGMENTS

A variety of people should be acknowledged for their assistance in developing this Planner. First, the clients who have been willing to share their lives and troubles have taught us more than can be written. Several staff members of the Community Mental Health Centers in Ionia County and Newaygo County (both in Michigan) have either knowingly or unknowingly provided feedback and ideas throughout the unfolding of this project. While developing the first edition of this Planner, the authors were also involved in the writing of The Mental Retardation and Developmental Disability Treatment Planner, with Kellye Slaggert. Many ideas developed for that Planner were adapted for this one. Barbara Berghuis, wife of the primary author, and a case manager herself, was instrumental in developing and critiquing the manuscript throughout the process. The library staff of Calvin College and Seminary were invaluable in their assistance while researching material for this project.

This second edition has been improved beyond measure by the guidance and contribution of Dr. Tim Bruce. He has been our well-informed expert on the evidence-based content that exists in the professional literature. Thank you, Tim.

Sue Rhoda, our manuscript manager, has been a wonderful assistant who has very efficiently kept all the details organized, allowing us to submit a final product that has been polished by her professional hand. Thank you, Sue.

No project this large gets completed without other priorities being rearranged. The willingness of our families to allow us to take the time to bring this idea to fruition is very much appreciated. It is their support and guidance that have allowed us to help others. The editorial staff at John Wiley & Sons has consistently provided us with supremely competent encouragement and guidance for which we are grateful.

A. E. J.
