The Handbook of the Psychology of Communication Technology
Handbooks in Communication and Media

This series aims to provide theoretically ambitious but accessible volumes devoted to the major fields and subfields within communication and media studies. Each volume sets out to ground and orientate the student through a broad range of specially commissioned chapters, while also providing the more experienced scholar and teacher with a convenient and comprehensive overview of the latest trends and critical directions.

The Handbook of Children, Media, and Development, edited by Sandra L. Calvert and Barbara J. Wilson
The Handbook of Crisis Communication, edited by W. Timothy Coombs and Sherry J. Holladay
The Handbook of Internet Studies, edited by Mia Consalvo and Charles Ess
The Handbook of Rhetoric and Public Address, edited by Shawn J. Parry-Giles and J. Michael Hogan
The Handbook of Critical Intercultural Communication, edited by Thomas K. Nakayama and Rona Tamiko Halualani
The Handbook of Global Communication and Media Ethics, edited by Robert S. Fortner and P. Mark Fackler
The Handbook of Communication and Corporate Social Responsibility, edited by Øyvind Ihlen, Jennifer Bartlett and Steve May
The Handbook of Gender, Sex, and Media, edited by Karen Ross
The Handbook of Global Health Communication, edited by Rafael Obregon and Silvio Waisbord
The Handbook of Global Media Research, edited by Ingrid Volkmer
The Handbook of Global Online Journalism, edited by Eugenia Siapera and Andreas Veglis
The Handbook of Communication and Corporate Reputation, edited by Craig E. Carroll
The Handbook of Media and Mass Communication Theory, edited by Robert S. Fortner and P. Mark Fackler
The Handbook of International Advertising Research, edited by Hong Cheng
The Handbook of the Psychology of Communication Technology, edited by S. Shyam Sundar
Dedicated to Cliff Nass (1955–2013), teacher, advisor, mentor, friend, and a pioneering force in the study of psychology of communication technology

Contents

Biographical Notes x
Preface xviii
Acknowledgments xx

Part I  Theoretical Overviews 1

1. Interpersonal and Hyperpersonal Dimensions of Computer-Mediated Communication 3
Joseph B. Walther, Brandon Van Der Heide, Artemio Ramirez, Jr., Judee K. Burgoon, and Jorge Peña

2. Group Identity, Social Influence, and Collective Action Online: Extensions and Applications of the SIDE Model 23
Russell Spears and Tom Postmes

3. Toward a Theory of Interactive Media Effects (TIME): Four Models for Explaining How Interface Features Affect User Psychology 47
S. Shyam Sundar, Haiyan Jia, T. Franklin Waddell, and Yan Huang

Part II  Source Orientation: Avatars, Agents and Androids 87

4. Examining Perception and Identification in Avatar-mediated Interaction 89
Kristine L. Nowak

5. Effects of Visual Cues on Social Perceptions and Self-Categorization in Computer-Mediated Communication 115
Eun-Ju Lee and Soo Youn Oh

6. Social Effects of Virtual and Robot Companions 137
Nicole C. Krämer, Astrid M. Rosenthal-von der Pütten, and Laura Hoffmann

Contents

20. Psychological Approaches to Credibility Assessment Online  445
   Miriam J. Metzger and Andrew J. Flanagin

Part VI  Good Technology for Better Health  467

21. Trust and Engagement in Online Health: A Timeline Approach  469
   Elizabeth Sillence and Pam Briggs

22. Computer-Mediated Support for Health Outcomes: Psychological
    Influences on Support Processes  488
   Kevin B. Wright

23. Using Digital Games to Promote Health Behavior Change  507
   Debra A. Lieberman

24. Leveraging Psychology of Virtual Body for Health and Wellness  528
   Giuseppe Riva, Antonios Dakanalis, and Fabrizia Mantovani

25. Treating Emotional Problems with Virtual and Augmented Reality  548
   Rosa M. Baños Rivera, Cristina Botella Arbona,
   Azucena García-Palacios, Soledad Quero Castellano,
   and Juana Bretón López

Index  567
Cristina Botella is Full Professor of Clinical Psychology at Universitat Jaume I, Spain. Her main research line is the design and testing of clinical applications based on information and communication technologies for the treatment of emotional disorders. She has published over 100 papers and participated in various research projects granted by national as well as European funds.

Jeremy N. Bailenson is Founding Director of VHIL and an Associate Professor in the Department of Communication at Stanford. His main area of interest is the phenomenon of digital human representation. His findings have been published in over 70 academic papers in the fields of communication, computer science, education, and psychology.

Juana Bretón-López is an Assistant Professor of Psychological Treatments at the Universitat Jaume I, Spain. Her main research interests are anxiety disorders or behavioral addictions and the application of new technologies to treat these. She has published over 27 papers and participated in several research projects.

Pam Briggs holds a Research Chair at Northumbria University, where she explores identity, trust, privacy, and security and inclusion issues in social media. Her current projects address trust issues in peer-to-peer health care, the influence of social media in message dissemination during pandemics, location-based services and technologies, and cybersecurity identity management and digital personhood.

Judee K. Burgoon is a Professor and Director of Human Communication Research, Center for the Management of Information at the University of Arizona and a Distinguished Visiting Professor with the Department of Communication at the University of Oklahoma. She is the most prolific female scholar in communication in the twentieth century.
Jenna L. Clark is a Graduate Student and Royster Fellow at the University of North Carolina at Chapel Hill. Her research explores how individuals’ perceptions of online relationships (perceived reality) can affect the outcomes of those relationships.

Antonios Dakanalis is currently Post-Doc Researcher at the University of Pavia, Pavia, Italy. His research interests are related to the concept of self-objectification and its role in the etiology of eating disorders. More, he is interested to explore the potential of positive technologies in the field of well-being and health care.

Kathleen M. Cumiskey is Associate Professor at the College of Staten Island, City University of New York. She is an expert in the social consequences of mobile technology. Her latest publications focus on the role that mobile phones play in changing people’s perception of their Social and emotive environments. She is the coeditor (with Larissa Hjorth) on a volume published by Routledge entitled: *Mobile Media Practices, Presence, and Politics: The Challenge of Being Seamlessly Mobile* (2013).

Nicole B. Ellison (Ph.D., University of Southern California) is an Associate Professor in the School of Information at the University of Michigan. Her research focuses on how individuals and groups use online tools to initiate, maintain, and benefit from their social relationships.

Andrew J. Flanagin is Professor in the Department of Communication at the University of California at Santa Barbara. His research focuses on the ways in which information and communication technologies structure and extend human interaction, with particular emphasis on the processes of organizing and information evaluation and sharing.

Azucena García-Palacios is Professor of Abnormal Psychology at Universitat Jaume I, Spain. One of her main line of research is the design and testing of clinical applications based on information and communication technologies for the treatment of emotional disorders. She has published over 50 papers and she has participated in several research projects.

Melanie C. Green is an Assistant Professor of Communication at the University of Buffalo (SUNY). Her research examines the reasons why individuals choose online or ersatz interactions, and the consequences of these actions.

Mark D. Griffiths is Professor of Gambling Studies at the Nottingham Trent University. Dr. Griffiths has published over 450 refereed journal papers mainly in the area of behavioral addiction and has won 14 national and/or international awards for his work.

Jamie Guillory (Ph.D., Cornell University) is a Postdoctoral Fellow at the University of California, San Francisco, in the Center for Tobacco Control Research & Education (http://tobacco.ucsf.edu/users/jeg258). She studies the influence of technology on emotions, social behavior, and health using big data, experiments, surveys, and mobile Apps (https://sites.google.com/site/jamieguillory/home).
**Biographical Notes**

**Anouk den Hamer** (VU University Amsterdam) is a Ph.D. student in Media Psychology and Lecturer in Statistics and Methods at VU University Amsterdam. She holds a B.A. in Media Studies and an M.A. in Communication Science. She studies victimization and the role of media use in cyberbullying behavior among adolescents.

**Jeffrey T. Hancock** is a Professor in the Department of Communication and Cochair of the Department of Information Science at Cornell University. His work is concerned with how social media affect psychological and interpersonal processes, with a particular emphasis on understanding how language can reveal psychological and social dynamics.

**Brandon Van Der Heide** is an Assistant Professor of communication at Michigan State University. His primary interests include investigating how impression formation and social influence processes are changed when people interact using communication technologies and how these communication processes affect areas of practical interest such as electronic commerce.

**Laura Hoffmann** is doing her Ph.D. on social robotics. She is working as a Research Associate at the Department of Social Psychology: Media and Communication at the University of Duisburg-Essen, Germany. Her research interests lie in the area of social psychology and media psychology, with a particular focus on human–robot interaction (https://www.uni-due.de/sozialpsychologie/Hoffmann.shtml).

**Johan F. Hoorn** (D.Litt., D.Sc.) is Senior Associate Professor of Communication Science at VU University, Amsterdam. He is the principal investigator and project leader of Services of Electro-Mechanical Care Agencies (SELEMCA) directed at the creation of android robots in the care domain, so called “Caredroids.”

**Yan Huang** is a doctoral student at the Pennsylvania State University. Her current research focuses on the psychological effects of media technologies. She is especially interested in how technological affordances influence the processes and outcomes of online persuasion in a variety of contexts such as health communication, advertising, and e-commerce.

**Haiyan Jia** (PhD, Penn State University) is a post-doctoral scholar at the Penn State University in the College of Information Sciences and Technology. Her research interest primarily focuses on the social and psychological effects of communication technology ranging from Web to mobile apps to smart objects. She also researches technology use in cross-cultural and international communication contexts.

**Benjamin K. Johnson** (M.A., Michigan State University) is a doctoral candidate at the School of Communication, The Ohio State University. His research is focused on selective exposure in new media settings, especially as it relates to social comparison and impression management (http://www.comm.ohio-state.edu/component/comprofiler/userprofile/106.html).
Sriram “Sri” Kalyanaraman is a Professor of journalism at the University of Florida’s College of Journalism and Communications. His primary research focuses on persuasion and attitude change in online environments, particularly as informed by customized and interactive messages. He currently serves as co-editor of Media Psychology.

Cody O. Karutz is the Manager of Stanford University’s Virtual Human Interaction Lab (VHIL). His main areas of interest are how virtual reality technologies and devices can be utilized to create new educational platforms.

Silvia Knobloch-Westerwick (Ph.D., University of Music, Theater, and Media, Hanover, Germany) is Professor at the School of Communication at The Ohio State University and Director of the Graduate Studies Program. She serves as Editor of Media Psychology. Her research examines media uses and effects, with a focus on selective exposure in the contexts of political communication, health communication, news, entertainment, and communication technologies (http://www.comm.ohio-state.edu/sknoblochwesterwick). Her latest monograph is titled “Choice and Preference in Media Use: Advances in Selective Exposure Theory and Research” (http://www.routledge.com/9780805855159).

Nicole C. Krämer (Ph.D., University of Cologne) has been leading the team of Social Psychology: Media and Communication as a Professor at the University of Duisburg-Essen, Germany. Her research interests include social aspects of human technology interaction and computer-mediated communication (https://www.uni-due.de/sozialpsychologie/ kraemer.shtml).

Elly A. Konijn (Ph.D., Utrecht University, the Netherlands) is Professor of Media Psychology at VU University Amsterdam (http://www.fsw.vu.nl/en/departments/communication-science/staff/konijn/), Former Editor of Media Psychology and Chair of ICA’s Information Systems. Her research focuses on media use among adolescents, emotions and reality-fiction perceptions, virtuality, and empathic robots. Application areas are human well-being and health, media education, and creative industry (e.g., http://crispplatform.nl/projects/selemca).

Daria J. Kuss is a Lecturer in Applied Psychology at the Birmingham City University, UK. Dr. Kuss has published widely in many international journals and book chapters in the area of cyberpsychology and online addiction, with particular expertise in online gaming addiction.

Robert LaRose, Ph.D. (University of Southern California, 1979), is a Full Professor in the Department of Media and Information at Michigan State University. His area of interest is the use and effects of new media.

Eun-Ju Lee (Ph.D., Stanford University) is Professor in the Department of Communication at Seoul National University. Her research focuses on social cognition and social influence in computer-mediated communication. She has served as Associate Editor of Human Communication Research and Journal of Communication.
