MAST CELLS AND BASOPHILS: DEVELOPMENT, ACTIVATION AND ROLES IN ALLERGIC/AUTOIMMUNE DISEASE
The Novartis Foundation is an international scientific and educational charity (UK Registered Charity No. 313574). Known until September 1997 as the Ciba Foundation, it was established in 1947 by the CIBA company of Basle, which merged with Sandoz in 1996, to form Novartis. The Foundation operates independently in London under English trust law. It was formally opened on 22 June 1949.

The Foundation promotes the study and general knowledge of science and in particular encourages international co-operation in scientific research. To this end, it organizes internationally acclaimed meetings (typically eight symposia and allied open meetings and 15–20 discussion meetings each year) and publishes eight books per year featuring the presented papers and discussions from the symposia. Although primarily an operational rather than a grant-making foundation, it awards bursaries to young scientists to attend the symposia and afterwards work with one of the other participants.

The Foundation's headquarters at 41 Portland Place, London W1B 1BN, provide library facilities, open to graduates in science and allied disciplines. Media relations are fostered by regular press conferences and by articles prepared by the Foundation's Science Writer in Residence. The Foundation offers accommodation and meeting facilities to visiting scientists and their societies.

Information on all Foundation activities can be found at http://www.novartisfound.org.uk

DEVELOPMENT, ACTIVATION
AND ROLES IN ALLERGIC/
AUTOIMMUNE DISEASE
Participants of Novartis Foundation symposium on Mast cells and basophils: development, activation and roles in allergic/autoimmune disease

Standing: Yukihiro Kitamura, Silvia Monticelli, Timothy Williams, Israel Pecht, David Lee, Richard Stevens, Andrew Walls, Don MacGlashan, Shamshad Cockcroft, Dean Metcalfe, Shigeo Koyasu, Peter Bradding, Juan Rivera, Henry Metzger, Toshiaki Kawakami, Jean Marshall, Ehud Razin, Anna Koffer, Hans Oettgen, Gerald Dubois

Seated: Anjana Rao, Frank Austen, Jeremy Santa Ono, Susan MacDonald, Yuko Kawakami, Melissa Brown
Contents

Symposium on Mast cells and basophils: development, activation and roles in allergic/autoimmune disease, held at the Novartis Foundation, London, 16–18 November 2004

Editors: Derek J. Chadwick (Organizer) and Jamie Goode

This symposium was based on a proposal made by Santa Jeremy Ono

Santa Jeremy Ono  Chair’s introduction  1

Yukihiko Kitamura  MITF and SgIGSF: an essential transcription factor and its target adhesion molecule for development and survival of mast cells  4
Discussion  11

Paul J. Bryce, Mendy L. Miller, Ichiro Miyajima, Mindy Tsai, Stephen J. Galli and Hans C. Oettgen  Immune sensitization in the skin is enhanced by antigen-independent effects of IgE on mast cells  15
Discussion  24

Yasuko Furumoto, Gregorio Gomez, Claudia Gonzalez-Espinosa, Martina Kovarova, Sandra Odom, John J. Ryan and Juan Rivera  The role of Src family kinases in mast cell effector function  39
Discussion  47

Richard L. Stevens, Nasa Morokawa, Jing Wang and Steven A. Krilis  RasGRP4 in mast-cell signalling and disease susceptibility  54
Discussion  68

J. Abramson, E. A. Barbu and I. Pecht  Regulation of mast cell secretory response to the type I Fcε receptor: inhibitory elements and desensitisation  78
Discussion  89

General discussion I  95
Toshiaki Kawakami, Jiro Kitaura, Wenbin Xiao and Yuko Kawakami  
IgE regulation of mast cell survival and function 100  
_Discussion_ 108

See-Ying Tam, Janet Kalesnikoff, Susumu Nakae, Mindy Tsai and Stephen J. Galli  
RabGEF1, a negative regulator of Ras signalling, mast cell activation and skin inflammation 115  
_Discussion_ 124

Masako Toda, Takao Nakamura, Masaharu Ohbayashi, Yoshifumi Ikeda, Maria Dawson, Ricardo Micheler Richardson, Andrew Alban, Benjamin Leed, Dai Miyazaki and Santa Jeremy Ono  
Role of CC chemokines and their receptors in multiple aspects of mast cell biology: comparative protein profiling of FceRI- and/or CCR1-engaged mast cells using protein chip technology 131  
_Discussion_ 140

General discussion II 145

Shigeo Koyasu, Akiko Minowa, Yasuo Terauchi, Takashi Kadowaki and Satoshi Matsuda  
The role of phosphoinositide-3-kinase in mast cell homing to the gastrointestinal tract 152  
_Discussion_ 161

K. Frank Austen  
The mast cell and the cysteinyl leukotrienes 166  
_Discussion_ 176

Silvia Monticelli, K. Mark Ansel, Dong U. Lee and Anjana Rao  
Regulation of gene expression in mast cells: micro-RNA expression and chromatin structural analysis of cytokine genes 179  
_Discussion_ 187

Cellina Cohen-Saidon and Ehud Razin  
The involvement of Bcl-2 in mast cell apoptosis 191  
_Discussion_ 195

General discussion III 198

P. A. Nigrovic and D. M. Lee  
Mast cells in autoantibody responses and arthritis 200  
_Discussion_ 210
CONTENTS

Greg D. Gregory, Allison Bickford, Michaela Robbie-Ryan, Mindy Tanzola and Melissa A. Brown  MASTering the immune response: mast cells in autoimmunity  215
Discussion  225

Dean D. Metcalfe  Mastocytosis  232
Discussion  242

Index of contributors  250

Subject index  252
Participants

K. Frank Austen  Brigham and Women’s Hospital, Harvard Medical School, Division of Rheumatology, Immunology and Allergy, One Jimmy Fund Way, Smith Bldg, Boston, MA 02115, USA

Peter Bradding  Department of Respiratory Medicine, Glenfield Hospital, Leicester LE3 9QP, UK

Melissa Brown  Northwestern University School of Medicine, Department of Microbiology and Immunology, Tarry Medical Research Building 7-711, mail code S213, 320 East Superior Street, Chicago, IL 60611-3010, USA

Shamshad Cockcroft  Department of Physiology, University College London, Gower Street, London WC1E 6BT, UK

Gerald Dubois  Novartis Horsham Research Centre, Wimblehurst Road, Horsham, West Sussex RH12 5AB, UK

Stephen J. Galli  Departments of Pathology and of Microbiology and Immunology, Stanford University School of Medicine, 300 Pasteur Drive, Stanford, CA 94305-5324, USA

Toshiaki Kawakami  La Jolla Institute for Allergy and Immunology, Division of Cell Biology, 10355 Science Center Drive, San Diego, CA 92121, USA

Yukihiko Kitamura  Developmental Research Laboratories, Shionogi & Co Ltd, Futaba-cho 3-1-1, Toyonaka, Osaka, 561-0825, Japan

Anna Koffer  Department of Physiology, University College London, Gower Street, London WC1E 6BT, UK

Shigeo Koyasu  Keio University School of Medicine, Department of Microbiology and Immunology, 35 Shinanomachi, Shinjuku-ku, Tokyo 160-8582, Japan
David M. Lee  Department of Medicine, Division of Rheumatology, Immunology and Allergy, Brigham and Women's Hospital, Smith Building, Room 538A, 1 Jimmy Fund Way, Boston, MA 02115, USA

Susan M. MacDonal d  Division of Allergy and Clinical Immunology, Asthma and Allergy Center, Johns Hopkins University School of Medicine, 5501 Hopkins Bayview Circle, Baltimore, MD 21224-6801, USA

Donald MacGlashan  Johns Hopkins University School of Medicine, Department of Medicine, Clinical Immunology Division, 5501 Bayview Circus, Baltimore, MD 21224, USA

Jean S. Marshall  Department of Microbiology and Immunology, Dalhousie University, Sir Charles Tupper Medical Building, 7-G Lab, Halifax, Nova Scotia, B3H 1X5, Canada

Dean D. Metcalfe  NIAID, NIH, Laboratory for Allergic Diseases, 10 Center Drive, MSC 1881, Bldg 10, Rm 11C205, Bethesda, MD 20892-1881, USA

Henry Metzger  NIAMS, NIH, 9N-228, 10 Center Drive, MSC 1820, Bethesda, MD 20892-1820, USA

Silvia Monticelli  (Novartis Foundation Bursar)  CBR Institute for Biomedical Research, Harvard Medical School, 200 Longwood Avenue, Boston, MA 02215, USA

Hans Oettgen  Clinical Director, Division of Immunology, Children’s Hospital, 300 Longwood Avenue, Boston, MA 02115, USA

Santa J. Ono  (Chair)  Department of Immunology, Institutes of Ophthalmology and Child Health, University College London, 11-43 Bath Street, London EC1V 9EL, UK

Israel Pecht  Department of Immunology, The Weizmann Institute of Science, P O Box 26, Rehovot, 76100, Israel

Anjana Rao  Harvard Medical School and CBR Institute for Biomedical Research, Department of Pathology, 200 Longwood Avenue, Warren Alpert Bldg, Rm 152, Boston, MA 02115, USA

Ehud Razin  Biochemistry, Hebrew University Medical School, PO Box 12272, Jerusalem 91120, Israel
Juan Rivera  Molecular Inflammation Section, Molecular Immunology and Inflammation Branch, National Institute of Arthritis and Musculoskeletal and Skin Diseases, National Institutes of Health, Department of Health and Human Sciences, Bethesda, MD 20892-1820, USA

Richard Stevens  Brigham and Women’s Hospital, Department of Medicine, One Jimmy Fund Way, Smith Bldg., Rm 616B, Boston, MA 02115, USA

Andrew Walls  Immunopharmacology Group, Southampton General Hospital, Level F, South Block, Southampton SO16 6YD, UK

Timothy Williams  Leukocyte Biology, Biomedical Sciences Division, SAF Building, South Kensington Campus, London, SW7 2AZ, UK
