Beginning PHP, Apache, MySQL® Web Development
About the Authors

Michael “BuzzLY” Glass

Michael Glass has been a gladiator in the software/Web site development arena for more than eight years. He has more than ten years of commercial programming experience with a wide variety of technologies, including PHP, Java, Lotus Domino, and Vignette StoryServer. He divides his time between computer programming, playing pool in the APA, and running his Web site at www.ultimatespin.com. You can usually find him slinking around on the PHPBuilder.com forums, where he is a moderator with the nickname BuzzLY.

Thanks, Staci, for putting up with long and late hours at the computer. Elizabeth and Jason, it wouldn’t have been the same project without you two. And thanks to my code testers at www.ultimatespin.com: Spidon, Kaine, Garmy, Spidermanalf, Ping, Webhead, and FancyDan. You guys rock!

To Donna and Gerry, who have influenced my life more than they can ever know, and who taught me the importance of finishing what you’ve started.

Yann “Bunkermaster” Le Scouarnec

Yann is the senior developer for Jolt Online Gaming, a British gaming company. He is a moderator at PHPBuilder.com and a developer of open source PHP software for the gaming community. He has also worked for major software corporations as a software quality expert.

I thank all the innocent bystanders who got pushed around because of this project: Debra and Nancy, who were patient enough not to have homicidal thoughts; and my wife and kids, who barely saw me for six months.

Elizabeth Naramore

Elizabeth has been programming with computers since a very young age, and, yes, she remembers when software was packaged on cassette tapes. Graduating from Miami University at age 20 with a degree in Organizational Behavior, she found a world of opportunity awaiting her—in corporate marketing. Her first love was always computers, however, and she found herself sucked back to the programming world in 1997 through Web site design and development (once a computer geek, always a computer geek). While she plans to return to Miami to get her Masters in Computer Science, she currently stays busy running several Web sites. Her main focus is in e-commerce and running www.giftsforengineers.com.

Elizabeth has spent the past six years developing Web sites and coordinating all phases of Web site publication and production. She is currently a moderator at PHPBuilder.com, an online help center for PHP. Her other interests include poetry, arts and crafts, camping, and juggling the many demands of career, family, and the “other duties as assigned” that come along in life. She lives in Cincinnati, Ohio, with her husband, beautiful daughter, and a new baby on the way.
Gary “trooper” Mailer

After graduation from university in 1998, Gary worked in a major software house in central London as a quality assurance engineer, and also as the departmental Web developer (using ASP). This gave him a taste of Web development. After a few years, he made the jump into full-time Web development and has not looked back since.

Gary has worked in a few different sectors, including communications (Siemens) and hotels (Hilton), as well as in “traditional” development houses.

He is currently a freelance developer for a European communications company. Gary has been and continues to be an active member of and contributor to the PHPBuilder.com site.

Jeremy “stolzboy” Stolz

Jeremy is a Web developer at Cloverfish Inc. (www.cloverfish.net), a Web development company in Fargo, North Dakota. Jeremy is primarily a PHP/MySQL developer, but he has also worked with many other languages. When not working, he frequents the Internet and tries to keep up his programming skills. He is a contributor to and moderator at PHPBuilder.com. He also frequents many other computer-related Web sites to keep his skills sharp and up to date.

Thanks to my employer and colleagues for giving me the time and space to participate in this project. Also, thanks to Debra Williams Cauley at Wiley for getting me involved in this project for Wrox.

I dedicate this book to my wife and family for helping me get through the long hours of preparation and writing.

Jason “goldbug” Gerner

Jason currently spends his days working as a Web developer in Cincinnati and burns free time complaining about lack of support for Web standards and abusing XML. He can often be found lurking in the PHPBuilder.com discussion forums, waiting to chime in with nagging comments about CSS or code efficiency.

## Contents

**Introduction**

### Part I: Getting Started

#### Chapter 1: Introduction and Installation Configuration 9

- **Installation Configuration** 9
- **Brief Intro to PHP, Apache, MySQL, and Open Source** 10
  - What Is Open Source? 10
- **How the Pieces of the AMP Module Work Together** 11
  - Apache 12
  - PHP 13
  - MySQL 13
- **PHP5: The Future of PHP** 14
  - A Brief Overview of PHP5 14
  - How Changing to PHP5 Affects This Book 14
- **Installation Configuration of Apache** 14
  - Customizing Your Installation 15
- **Installation Configuration of PHP** 17
  - Testing Your Installation 18
  - Customizing Your Installation 19
- **Installation Configuration of MySQL** 20
  - Testing Your Installation 20
  - Configuring Your Installation 23

  *Try It Out: Setting Up Privileges* 27

- **Where to Go for Help and Other Valuable Resources** 28
  - Help within the Programs 28
  - Source Web Sites 28
  - AMP Installers 29

- **Summary** 29
Part II: Movie Review Web Site

Chapter 2: Creating PHP Pages

Overview of PHP Structure and Syntax
  How PHP Fits with HTML 34
  The Rules of PHP Syntax 34
  The Importance of Coding Practices 35

Creating Your First Program
  Try It Out: Using echo 37

Using HTML to Spice Up Your Pages
  Integrating HTML with PHP 39
  Try It Out: Using PHP within HTML 39
  Considerations with HTML Inside PHP 40

Using Constants and Variables to Spice Up Your Pages
  Overview of Constants 41
    Try It Out: Using Constants 42
  Overview of Variables 43
    Try It Out: Using Variables 43
  Passing Variables Between Pages 45
    Try It Out: Using URL Variables 47
    Try It Out: Passing the Visitor’s Username 52
  What Is a Cookie? 55
    Try It Out: Setting a Cookie 56
  Passing Through Forms 58
    Try It Out: Using Forms to Get Information 59

Using if/else Arguments
  Using if Statements 63
    Try It Out: Using if 64
  Using if and else Together 65
    Try It Out: Using if and else 65

Using Includes for Efficient Code
  Try It Out: Adding a Welcome Message 66

Using Functions for Efficient Code
  Try It Out: Working with Functions 68

A Word About Arrays
  Array Syntax 73
  Sorting Arrays 73
    Try It Out: Sorting Arrays 74
  foreach Constructs 74
    Try It Out: Adding Arrays 75
## Contents

**While You’re Here . . .**
- Try It Out: Using the while Function  
--- 79  

**Alternate Syntax for PHP**
- Alternates to the <?php and ?> php Tags  
- Alternates to the echo Command  
- Alternates to Logical Operators  
- Alternates to Double Quotes: Using heredoc  
- Alternates to Incrementing Values  
--- 83  

**Summary**  
--- 84  

**Exercises**  
--- 85  

---  

**Chapter 3: Using PHP with MySQL**  
--- 87  

**Overview of MySQL Structure and Syntax**
- MySQL Structure  
- MySQL Syntax and Commands  
--- 87  

**How PHP Fits with MySQL**
- Connecting to the MySQL Server  
--- 94  

**Looking at a Ready-Made Database**
- Try It Out: Creating a Database  
--- 96  

**Querying the Database**
- WHERE, oh WHERE  
  - Try It Out: Using the SELECT Query  
  --- 101  
- Working with PHP and Arrays of Data: foreach  
  - Try It Out: Using foreach  
  --- 105  
- A Tale of Two Tables  
  - Try It Out: Referencing Individual Tables  
  --- 106  
- Try It Out: Joining Two Tables  
--- 107  

**Helpful Tips and Suggestions**
- Documentation  
- Using PHPMyAdmin  
--- 109  

**Summary**  
--- 110  

**Exercises**  
--- 110  

---  

**Chapter 4: Using Tables to Display Data**  
--- 111  

**Creating a Table**
- Try It Out: Defining the Table Headings  
--- 111  
- Populating the Table  
  - Try It Out: Filling the Table with Data  
  --- 114  
  - Try It Out: Putting it All Together  
  --- 116  
  - Try It Out: Improving Our Table  
  --- 117
Contents

Who’s the Master? 120
  Try It Out: Adding Links to the Table 120
  Try It Out: Adding Data to the Table 122
  Try It Out: Calculating Movie Takings 123
  Try It Out: Displaying the New Information 124
  Try It Out: Displaying Movie Details 126
A Lasting Relationship 128
  Try It Out: Creating and Filling a Movie Review Table 128
  Try It Out: Querying for the Reviews 129
  Try It Out: Displaying the Reviews 131
Summary 133

Chapter 5: Form Elements: Letting the User Work with Data 135

Your First Form 136
  Try It Out: Say My Name 136
FORM Element 138
INPUT Element 139
Processing the Form 140
Driving the User Input 141
  Try It Out: Limiting the input choice 141
INPUT Checkbox Type 144
One Form, Multiple Processing 145
  Try It Out: Radio Button, Multi-Line List Boxes 145
Radio INPUT Element 149
Multiple Submit Buttons 150
Basic Input Testing 150
Dynamic Page Title 151
Manipulating a String as an Array to Change the Case of the First Character 151
Ternary Operator 151
Using Them All 152
  Try It Out: Hidden and password Input 152
The Skeleton Script 160
Default Response 160
Adding Items 160
Summary 161

Chapter 6: Letting the User Edit the Database 163

Preparing the Battlefield 163
  Try It Out: Setting Up the Environment 164
Inserting a Simple Record from phpMyAdmin 166
  Try It Out: Inserting Simple Data 166
<table>
